Contents of Volume 310

Vol. 310, Nos. 1–4 **August 1, 2005**

Factors influencing groundwater seepage in a large, mesotrophic lake in New York
R. L. Schneider, T. L. Negley and C. Wafer 1
A stochastic model for 3-dimensional flow patterns in infiltration experiments
M. Schlather and B. Huwe 17
A review of paired catchment studies for determining changes in water yield resulting from alterations in vegetation
A. E. Brown, L. Zhang, T. A. McMahon, A. W. Western and R. A. Vertessy 28
The significance of flow in the matrix of the Chalk unsaturated zone
S. A. Mathias, A. P. Butler, N. McIntyre and H. S. Wheater 62
Temporal analysis of the frequency and duration of low and high streamflow: years of record needed to characterize streamflow variability
S. Huh, D. A. Dickey, M. R. Meador and K. E. Ruhl 78
The water regime of the Monegros playa-lakes as established from ground and satellite data
C. Castañeda and J. Herrero 95
Relationship between transmissivity and specific capacity in the volcanic aquifers of Jeju Island, Korea
S.-Y. Hamm, J.-Y. Cheong, S. Jang, C.-Y. Jung and B.-S. Kim 111
A hybrid genetic—instance based learning algorithm for CE-QUAL-W2 calibration
A. Ostfeld and S. Salomons 122
Origin of the high variability of water mineral content in the bedrock aquifers of Southern Madagascar
V. Rabemanana, S. Violette, G. de Marsily, H. Robain, B. Deffontaines, P. Andrieux, M. Bensimon and A. Parriaux 143
Signatures in flowing fluid electric conductivity logs
C. Doughty and C.-F. Tsang 157
Assessment of chemical water types and their spatial variation using multi-stage cluster analysis, Queensland, Australia
V. H. McNeil, M. E. Cox and M. Preda 181
Spatial and temporal changes in the structure of groundwater nitrate concentration time series (1935–1999) as demonstrated by autoregressive modelling
A. L. Jones and P. L. Smart 201
Sensitivity analyses of a distributed catchment model to verify the model structure
A. Sieber and S. Uhlenbrook 216
Evaporation and land surface energy budget at the Salar de Atacama, Northern Chile
S. K. Kampf, S. W. Tyler, C. A. Ortiz, J. F. Muñoz and P. L. Adkins 236
The response of flow duration curves to afforestation
P. N. J. Lane, A. E. Best, K. Hickel and L. Zhang 253
Characterisation of streamflow regimes in central Spain, based on relevant hydrobiological parameters
D. B. Sanz and D. G. del Jalón 266
Groundwater use by vegetation in a tropical savanna riparian zone (Daly River, Australia)
S. Lamontagne, P. G. Cook, A. O'Grady and D. Eamus 280
An infiltration model based on flow variability in macropores: development, sensitivity analysis and applications
M. Weiler 294

doi:10.1016/S0022-1694(05)00280-5
